

XboxMediaCenter (XBMC) 12-02-2006 CVS T3CH build

Soumis par redrum
14-02-2006

Une nouvelle version du meilleur lecteur multimedia (^_^) par T3CH avec son lot d'ajouts et de fix habituels

* added: you can now jump directly to the saved playlists locations using the following commands:

Music: `Xbmc.ActivateWindow(MyMusicFiles,$Playlists)`

Video: `Xbmc.ActivateWindow(MyVideos,$Playlists)`

* added: `videoplayer.playlistlength` and `videoplayer.playlistposition` to info manager to match the musicplayer info items

* added: my files, settings, xlink kai to startup window settings to match xboxmediacenter.xml

* added: display a/v sync in codecinfo during playback in dvdplayer + some new code to prepare for a new syncing system.

* added: IP Address button from the normal virtual keyboard to link to the IP address input dialog.

* added: display cpu usage for audio/video/player thread in dvdplayer.

* added: New LCD info labels thanks to Jeff McClain.

le reste des changements est disponible ici
