XboxMediaCenter (XBMC) 25-07-2006 CVS T3CH build

Soumis par redrum
25-07-2006

T3CH a sorti une nouvelle compilation du CVS de XboxMediaCenter.
Cette compil' par T3CH regroupe tout ce qui était dans le CVS à ce moment avec juste quelques petits ajouts.
XBMC est en mode FEATUREFREEZE (en attendant la version stable 2.0) pour le moment.

Changements intéressants à noter sur les scripts et XMLs:
* changed: Moved the paplayer chain to fully use floating point (speedup and possible quality boosts)
* changed: cleanup and simplification of renderer and field rendering.
* changed: improved the profiles support somewhat. xbmc is now fully multiuser capable. http://www.xbmc.xbox-scene.com/wiki/index.php?title=Profiles.
* added: 'go to root' in context menu of media windows.

Voici les ajouts et changements depuis la version de T3CH datant du 16-07-2006:
* changed: Moved the paplayer chain to fully use floating point (speedup and possible quality boosts)
* changed: cleanup and simplification of renderer and field rendering.
combined async rendering of dvdplayer and mplayer
changed texture memory to not be write combined, allows fast reads
* changed: stacking of files was case sensitive on filenames before, now it's case insensitive
* changed: made seamless stacking quicker to startup with mplayer by not initing codecs or audio/video outputs and disabled caching of subtitles
* changed: removed DCHP IP from SystemInfo, and some other little changes
* changed: improved the profiles support somewhat. xbmc is now fully multiuser capable. http://www.xbmc.xbox-scene.com/wiki/index.php?title=Profiles. thanks to bpairs, jezz_x, chokeman and smokehead for skin work. known issue: webserver sometimes misbehaves on login/logout.
* added: 'go to root' in context menu of media windows.
* added: option to hide 'all' items in library views.
